## Alfa Romeo Model Identification

Alfa model designations can be somewhat confusing, particularly with the GT, GTV and Sprint names. The GT, GTV, and Sprint designations have been used on various models from the Giulietta Sprints of the mid 1950's through the GT's and GTV's of the 1960's and 1970's to the GTV/6 of 1987. Generally, GT, GTV, and Sprint refer to two door coupes, Spider to two door convertibles, and Berlina, Super, and TI to four door sedans. We have provided this chart to assist you in identifying your Alfa.

For 1955-59 Giuliettas, use the engine number (next to the distributor) for identification as the chassis numbers used were somewhat irregular. Some 750-series Giulietta's chassis numbers began with a 1400 number, and some began with a 101 number. The 1960 Spider and Sprint chassis numbers began with a 1495 number, which would indicate a 750 Giulietta, but in reality, it is a 101. There should be a separate plaque identifying it as a 101. The 1959 Giulietta was a transition year and many cars had 101 suspensions with 750 engines. There are a few 1959 Spiders which have the short wheelbase of the 750 series, but also have a vent wing window like the long wheelbase 101 Spiders.
